

Every kd-pür® Fish Oil Now Available as Vegan **Alga3™**

SUSTAINABLE, VEGAN OMEGA-3 SOLUTIONS

Alga3™ is a brand of  **KD Nutra®**
Creating Health Solutions

KD Nutra® is committed to science, sustainable sourcing, and supply chain certainty ensuring we can provide you with distinctive products that deliver results. Driven by this commitment, we have created Alga3™, a breakthrough nutritional platform of plant-based omega-3 concentrates from microalgae, which can be customized to provide a vegan alternative to any kd-pür® fish oil.

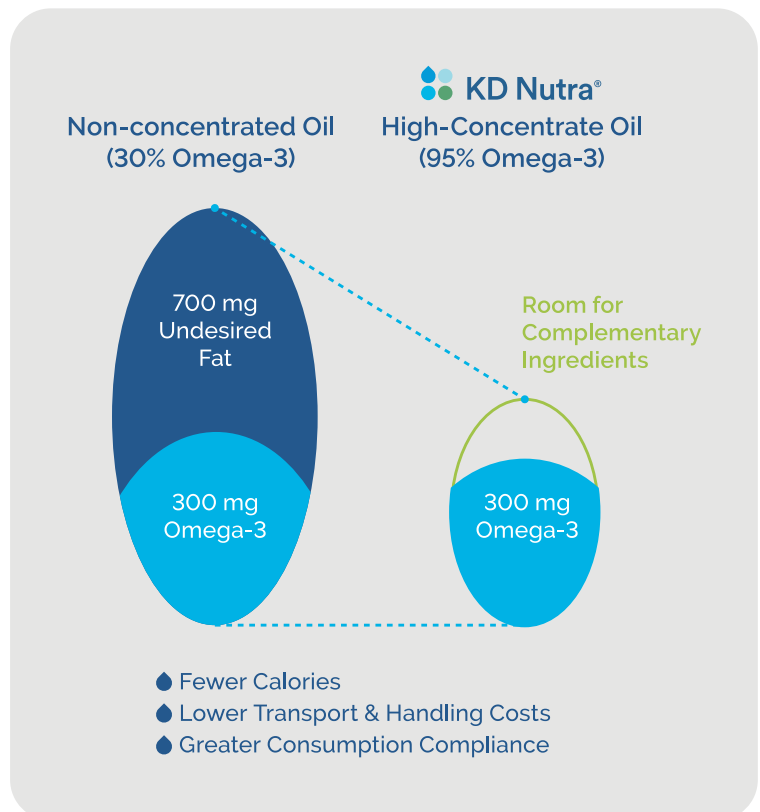

Why are omega-3 concentrates always a good idea?

Everyone knows that our body needs omega-3s to stay healthy. They play a role in overall health, including heart, brain and eye health, and a healthy pregnancy, and their benefits are supported by thousands of published scientific studies. GOED (the Global Organization for EPA & DHA Omega-3s) recommends consuming 500 mg of combined EPA and DHA per day for general health, and higher quantities for specific life stages or health conditions. The recommended intake can hardly be covered by normal diet alone, thus omega-3 supplementation remains the most convenient way to enjoy omega-3 benefits and avoid deficiency.

Go Higher With Alga3™ Concentrates

At KD Nutra® we use multiple state-of-the-art purification technologies processes which allow for the production of omega-3 microalgae oil, among other lipids extracts, that is unsurpassed in quality and purity, and provide the highest algal omega-3 concentrations on the market: up to **95% EPA*** and **95% DHA**. Higher concentrates mean smaller dosage per serving, which result in improved consumer compliance and additional room for complementary ingredients.

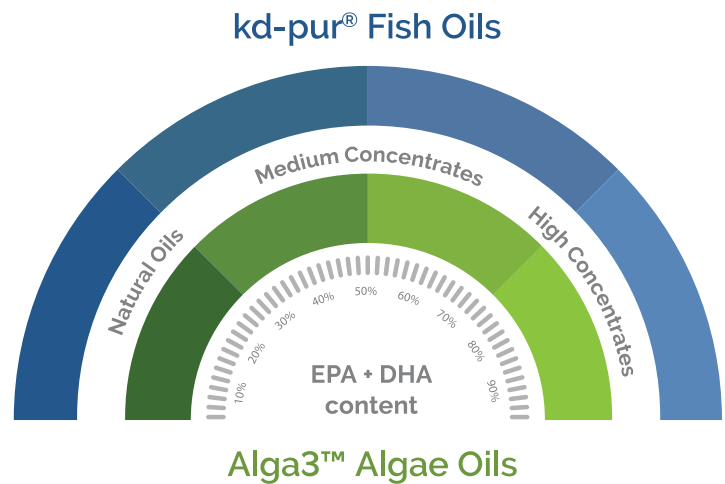

*Some market restrictions apply for high EPA concentrate products.

Think of any fish oil concentrate, KD Nutra® can make it Vegan!

KD Nutra®'s superior technology and production flexibility allows for a wide range of omega-3 concentrates. This means we can customize the EPA:DHA ratio on customer needs, and for any kd-pür® fish oil, there is a matching Alga3™ plant-based solution.

The Alga3™ platform can deliver microalgae oils in different formats, whether in vegetarian softgel capsules, bottled liquid, or emulsions, we have the solution that fits your needs. We can provide plant-based omega-3 fatty acids in all concentrations and ratios, as well as innovative omega-3 blends with other proprietary ingredients.

Sustainable Omega-3 Innovation for a New Generation of Consumers

Driven by market and consumer demand, KD Nutra® has searched for the most environmentally-friendly and innovative forms of omega-3. Alternative plant-based sources of omega-3, such as algae oils, meet the expectations of the new generation of consumers seeking products with minimal impact on the ecosystem without compromising quality and taste. Alga3™ from microalgae provides a breakthrough, innovative and sustainable opportunity for your brand that meets these consumer expectations.

For over 30 years, KD Nutra® has pioneered the development of great-tasting marine-derived omega-3 liquids, and now we can offer a real plant-based alternative. These clean-labeled products provide not only a full sensory experience, but also with the effective use of antioxidant, result in stable products with great flavor that deliver the essential omega-3s to your daily diet.

In addition to a liquid solution, KD Nutra® also offers delicious emulsions with a range of fruity flavors that makes it an excellent choice for all ages. 1 teaspoon can provide 1000 mg of Omega-3 that can be readily digested!

KD Nutra®'s softgel center of excellence can provide innovative softgels from simple oils to complex suspensions, that delivers consistent quality softgels. In addition, we offer non-animal gelatin softgels for a complete vegan finished product!

Expand Your Portfolio With Alga3™

- 100% plant-based source
- Highest concentration in the market
- Sustainable source
- Manufactured in a pharmaceutical c-GMP certified facility
- Green technology extraction (solvent-free)
- Supplements and food applications
- Free from environmental and marine pollutants
- Clean taste/smell profile
- Gluten-free, allergen-free
- Non-GMO
- Halal certified
