

JOB DESCRIPTION

JOB TITLE	Power Engineer (4th Class) – Boiler Technician
DEPARTMENT	Maintenance
REPORTING TO	Supervisor, Utilities
LOCATION	Mulgrave, NS
HOURS OF WORK	Shift Work- Rotating Schedule
JOB PURPOSE	<p>The Technician Maintenance – Utilities (Boiler Technician) is responsible for the operation, monitoring, maintenance, and troubleshooting of boiler, steam, refrigeration, air conditioning, and related utility systems throughout the facility.</p> <p>Working closely with the Maintenance team, this role helps ensure the continuous supply of critical utilities required to support production, quality, and operational requirements.</p>

KEY RESPONSIBILITIES

Utility Operations

- Operate, regulate, monitor, and shut down utility equipment as required.
- Monitor boilers, refrigeration systems, steam systems, compressed air systems, and related equipment using gauges, meters, and computerized controls.
- Ensure equipment operates safely, efficiently, and within established operating parameters.
- Maintain accurate operating logs and records.
- Perform water testing and chemical treatment programs to prevent corrosion and scale buildup.
- Identify, troubleshoot, and report equipment issues and operational concerns.

Maintenance & Reliability

- Perform routine preventive maintenance activities, including lubrication, filter replacement, and equipment inspections.
- Assist with repairs and maintenance activities as directed.
- Support major maintenance projects and system upgrades involving steam, refrigeration, and HVAC systems.
- Collaborate with Maintenance personnel to support plant reliability objectives.

Safety, Quality & Compliance

- Work safely and in accordance with all company policies, procedures, and regulatory requirements.
- Demonstrate and promote positive safety behaviors at all times.

- Follow all KD Pharma Life Saving Rules and EHS (Safety, Health & Environment) requirements.
- Report incidents, near misses, hazards, and improvement opportunities.
- Support quality systems and report any quality deviations or non-conformances.
- Maintain all required certifications and training.

Teamwork & Continuous Improvement

- Contribute to a positive and collaborative work environment.
- Participate in training, workshops, and development opportunities.
- Support continuous improvement initiatives across Safety, Quality, Maintenance, and Operations.
- Assist colleagues and other departments when operationally required.

QUALIFICATIONS & EXPERIENCE

- High School Diploma or GED.
- **4th Class Interprovincial Power Engineer Certificate (minimum requirement).**
- Knowledge of steam generation, refrigeration, HVAC, and utility systems.
- Ability to interpret operating procedures, technical documents, and P&IDs.
- Strong troubleshooting and problem-solving skills.
- Ability to work rotating shifts, including nights, weekends, and holidays.

Preferred

- Previous experience operating industrial boilers and utility systems in a manufacturing environment.
- Experience with computerized control systems and process monitoring equipment.
- Additional technical training related to industrial utilities or maintenance systems.

What You'll Bring

- Strong commitment to safety and operational excellence.
- Mechanical aptitude and technical problem-solving skills.
- Ability to make sound decisions under pressure.
- Strong attention to detail and record-keeping.
- Effective communication and teamwork skills.
- Reliability, accountability, and a continuous improvement mindset.
