

Your partner for first-class lipid analysis of Omega-3 oils

KD LabService™ is a third-party laboratory that provides highly accurate lipid analysis of Omega-3 bulk oils or capsules under **cGMP** conditions.

With almost four decades of experience as an Omega-3 manufacturer, as part of the KD Pharma Group™, we have established ourselves as a trusted partner for companies around the world in the pharmaceutical, food and dietary supplement industries.

Pure Precision™ is how KD LabService guarantees accurate and reliable customer oil analysis.

Independent. Precise. Passionate.

Independent in-house quality control laboratory is one of our main pillars in ensuring the quality of our products. We have a dedicated team of highly qualified seasoned experts in the analysis of lipids. To meet the need for reliable laboratory services in the field of Omega-3, we have decided to offer our high-precision analysis as a professional, independent laboratory service.

Using state-of-the-art laboratory technology and methods in accordance with various pharmacopoeias (Ph. Eur./USP/JP), we guarantee the highest standards of quality and accuracy.

As a cGMP-certified company, we are used to adhering to strict guidelines and processes to ensure the safety and quality of our services.

We guarantee accurate and reliable results, analysis to the highest quality standards and help you to bring your products safely to market.
